1.0 INTRODUCTION

This report is submitted by ICAIR, Life Systems, Inc. under Environmental Protection Agency (EPA) Region V ARCS Contract No. 68-W8-0093, Subcontract No. 68-W8-0093-D with Donohue & Associates, Inc. (Donohue). This report summarizes the findings and recommendations arising from ICAIR's review of the Potentially Responsible Party (PRP) responses to EPA Information Requests concerning the Himco Landfill, County Road 10, Elkhart, Indiana.

This project was completed by Life Systems, Inc. under Donohue Work Assignment (WA) No. 71-5L4J (ICAIR WA No. 101522), in accordance with the specifications described in ICAIR's revised WA Plan No. TR-1107-3-10A, submitted to Donohue on January 22, 1990, and ICAIR's letter dated January 4, 1991 from Cynthia D. Patrick to Ms. Bernadette A. Ryan. This letter further clarified the scope of this effort and was prepared after receipt of the PRP responses and background data.

Additional deliverables submitted with this report are a printout of the PRPBase Letter Tracking Report No. 2, "Listing of all Letters with PRP Codes Translated," and a diskette of the PRPBase Letter Tracking Report.

2.0 OBJECTIVES

The objectives of this WA were to:

1. Review and summarize the responses and all attachments submitted by Himco Landfill PRPs in reply to the Environmental Protection Agency's (EPA's) Information Requests delivered to PRPs during the period November 10, 1988 to April 27, 1989 pursuant to the authority of Section 104(e) of Comprehensive Environmental Response, Compensation, and Liability Act/Superfund Amendments and Reauthorization Act, as amended (CERCLA/SARA), and Section 3007 of the Resource Conservation and Recovery Act (RCRA).
2. Document the response information using the Letter Tracking File of the EPA's PRP database (PRPBase).
3. Evaluate the response information and provide a brief summary report of observations and recommendations.
4. List the names, PRP codes and letter date information of all other PRPs identified by the EPA through its investigations of the Himco Landfill site, including those who were not sent Information Requests, those who did not respond to Requests sent, and those whose responses were not contained in the files provided to ICAIR by the EPA Region V.

This report describes the approach, assumptions, deliverables and recommendations resulting from ICAIR's review of the responses and background material submitted by Himco Landfill PRPs in accordance with the above Information Requests.

3.0 APPROACH

Three primary sources of information were used to complete the enclosed Letter Tracking File for the Himco landfill: (1) the responses and background information submitted by the PRPs or their representatives, (2) the "Consolidated Himco PRP List" prepared by Donohue and Associates and submitted to Mr. Robert Lance, EPA Region V Remedial Project Manager, on December 21, 1990, and (3) the EPA Information Requests dated November 10, 1988 and April 21, 1989. The majority of PRPs had received one or both of these requests. Other Notice Letters were also mailed to specific PRPs and the dates of these letters are also listed in the Letter Tracking File, where applicable.

On December 28, 1990 ICAIR received copies of Himco PRP responses obtained from EPA Region V files. These copies contained all non-Confidential Business Information (CBI) material submitted by the 158 PRPs who had responded to EPA's Information Requests or Notices. The copies had been alphabetized by PRP name and were clipped or bound, as appropriate. They appeared complete and photocopy quality was excellent.

The Consolidated Himco PRP list prepared by Donohue on December 21, 1990 was relied upon to provide an accurate record of the dates the Information Requests were sent and received by the PRPs, and the dates the responses were received by EPA. This list was also used to obtain the names of all PRPs identified by the EPA from its site investigation sources. The scope of ICAIR's effort did not require verification of this list; however, we did provide missing information where it was available in the response files. A review of the consolidated PRP list indicated that a total of 583 PRPs are named and 158 of these PRPs submitted responses to the Information Requests.

A fourth source of information made available to ICAIR was a Letter Tracking File printout prepared by the EPA earlier in the site investigations (01/18/89). This Letter Tracking File was incomplete; however, the response summaries contained therein were reviewed and compared to ICAIR's current response summaries to ensure there were no major discrepancies.

The approach utilized in evaluating PRP responses and preparing the Letter Tracking File is described briefly in the sections below.

3.1 Review of PRP Responses and Preparation of Data Coding Forms

Each PRP response package, including all correspondence and enclosures, was reviewed to obtain the information requested on the Data Coding Form (Figure 3-1) for entry into the PRPBase Letter Tracking File. This review was focused on obtaining the following information. The paragraph numbers correspond to entries on Figure 3-1.

1. The PRP Code is a six-letter code developed to identify each PRP. This code is typically the first six letters of the PRP's business name or, in the case of individuals, the PRP's surname. Note that the Letter Tracking File is alphabetized by the first word of the PRP's business name or, in the case of individuals, by the PRP's last name and not by the PRP code.

HIMCO SITE

DATA CODING FORM
Database File: Letter Tracking

• New Letter Sent (Coded by, date _____ Entered by, date _____)

- ① PRP Code: _____
- ② Date Letter Sent (MM/DD/YY, 01/01/87): ____ / ____ / ____
- ③ Type of Letter Sent: _____
- ④ Date Followup Letter Sent: ____ / ____ / ____

• Letter Received by PRP (Coded by, date _____ Entered by, date _____)

- ⑤ Date Letter Received by PRP (MM/DD/YY, 01/01/87): ____ / ____ / ____
- ⑥ Date Followup Letter Received by PRP: ____ / ____ / ____

• Response From PRP (Coded by, date _____ Entered by, date _____)

- ⑦ Date Response Received from PRP (MM/DD/YY, 01/01/87): ____ / ____ / ____
- ⑧ Summary of Response (140 Characters):

⑨ Will PRP participate in a RI/FS? (Y/N) ____ A RD/RA? (Y/N) ____

⑩ Did PRP generate haz. waste? (Y/N) ____

⑪ And/or dispose of haz. waste at this site? (Y/N) ____

⑫ Date range site used: from ____ / ____ / ____ thru ____ / ____ / ____, inclusive

⑬ Has PRP included information about insurance? (Y/N) ____

⑭ Has PRP requested CBI? (Y/N) ____ Or FOIA? (Y/N) ____

⑮ Transporters Used by PRP: _____ | _____ | _____ | _____ |
_____ | _____ | _____ | _____ |

2. The date of EPA's first letter to this PRP, obtained from copies of the EPA letter in the PRP's file or other sources (e.g., the EPA site file, PRP Search Report, etc.).^(a)
3. The type of letter the PRP received (I = Information Request; N = Notice).
4. The date of EPA's second (or follow-up) letter to this PRP.^(a) Note that the database does not allow for the entry of any additional followup letter dates.
5. The date on which the PRP received its first letter from EPA, as indicated by postal receipts contained in the PRP's files^(a)
6. The date on which the PRP received its second (or follow-up) letter from EPA, as indicated by postal receipts contained in the PRP's file.^(a)
7. The date the first response from this PRP was received at EPA as indicated by date-stamped response package. Note that the database allows for entry of only one date^(a) in this field. Some PRPs have submitted more than one response.
8. The response summary field (limited to 140 characters) was prepared to provide as much relevant information as possible within the space limitations. Information deemed necessary for the response summary field included: a brief description of the PRP's business; the time period or dates the PRP used Himco Inc. or Himco Waste Away Services (Himco) for disposal of its wastes; the types of wastes disposed by Himco; whether or not any wastes generated by the PRP were/are hazardous and, if so, what arrangements currently exist or have been used for the disposal of hazardous wastes. Also of interest was the identification by the responders of any additional PRPs.
9. Whether or not the PRP is involved in the Remedial Investigation/Feasibility Study (RI/FS) and/or the Remedial Design/Remedial Action (RD/RA) processes.
10. If the PRP had previously (or currently) generated any hazardous wastes, this is indicated as a "yes" in this field, whether or not these wastes are recycled, reclaimed or disposed by other licensed firms or waste streams. This "yes" response does not imply that the wastes were sent to Himco.
11. The "yes" or "no" answer to whether the PRP disposed of hazardous wastes at the Himco site was determined from the PRPs' own responses; no independent judgments were made by ICAIR. Of course,

(a) All letter dates were obtained from the Himco Consolidated PRP List provided by Donohue. Some were corrected or supplemented based on information contained in the response files.

if the PRP claimed they did not generate hazardous wastes at all, or had no relationship with Himco before December 31, 1976, the answer to this question is also "no." (Note that all answers to the question "[Did PRP] dispose of hazardous wastes at this site?" is "no" for every PRP responding.)

12. The entries for the "Date range site used" column required a thorough review of response background information, invoices, Himco service contracts and inferences made by respondents. Considerable judgment was needed to determine whether any hazardous or nonhazardous wastes were transported to the site between January 1, 1960 and December 31, 1976. To further complicate this review, the first EPA Information Request Letter, dated November 10, 1988, did not specify this time period of concern (1960-1976) or the address (County Road 10) of the site. Therefore, in their attempts to cooperate with the EPA in this investigation, PRPs who are currently using Himco (1980s) sent copies of all available invoices, which typically covered the past seven to ten years. As a result, these response packages were encumbered by copies of invoices for nonrelevant time periods. In addition, they neglected to specify the start dates of their contracts with Himco.

For entries in this field, if the PRP actually specified they used Himco before the County Road 10 site was closed (12/31/76), the start date (if specified by the PRP) is indicated, and the end date is listed as 12/31/76 (the closure date for this site), even though the PRP may still be using Himco's services. Due to a limitation of the database, if the PRP listed only the year and not the month and day they started with Himco, the dates "01/01" were entered in this field. The database does not allow blank or other artificial entries (e.g., "xx/xx") in this field.

If no start dates were specified or no invoices for the period of concern were submitted by the PRPs, this field was left blank, and a special notation was made in the response summary.

13. The question concerning information about insurance was answered "yes" whenever the PRP stated anything about the availability or nonavailability of insurance. For example, if a PRP stated they have no insurance for this type of liability, the question was still answered "yes." In some cases, the PRP sent copies of policies, in others, only the names of carriers and types and amounts of policies were included. Again, any statement referring to insurance coverage, whether negative or positive, was deemed adequate for response purposes and was answered "yes."
14. The questions concerning CBI or FOIA handling of responses is self-explanatory. Two responders requested CBI handling and those responses are filed in the Resource Conservation and Recovery Act (RCRA) CBI files in EPA Region V Offices and were not made available to ICAIR for review. This is noted in the response summaries for these PRPs and further discussed in Section 4.5 below.

15. The entry for "shipper codes" is not intended to list all transporters used by the PRP, regardless of their destination. The field is only intended to identify those transporters who may have transported wastes to the site in question during the time period of concern. Therefore, unless the PRPs indicated that other haulers took their waste to the Himco County Road 10 landfill between January 1, 1960 and December 31, 1976, the only transporter listed in this field is "HIM" for Himco. (Note that no other transporters were identified by the PRPs).

Two additional fields, not listed on the Data Coding form, are included on the database printout: (1) Attachments (Att) and (2) Financial (Fin). The attachment field was answered "yes" if the PRP included any enclosure with its response letter (e.g., invoices, Himco service agreements, Material Safety Data Sheets, etc.). If the PRP included information on its financial status (e.g., annual reports, Dun & Bradstreet reports, etc.) this field was answered "yes." (Note that none of the PRPs included financial information. This information was not requested in the EPA's letters.)

3.2 Database Development

The database for this Letter Tracking File (PRPBase) was developed by EPA and its contractors in early 1987 and updated in September, 1988. ICAIR used this September, 1988 version to prepare the enclosed Letter Tracking File. To our knowledge, this is the most current version of the data base. The user's manual prepared by CDM Corporation dated July, 1988 is to be utilized for use or revision of this data base. A diskette of the enclosed Letter Tracking File is also submitted with this report.

3.3 Quality Assurance/Quality Control

All data base entries were reviewed for accuracy against the handwritten Data Coding Forms and Donohue's consolidated Himco PRP list. Specific PRP responses were selected randomly by both the Life Systems' Quality Assurance Manager and the Program Manager for the subcontract and checked against the Data Coding Form and the actual response package for accuracy, completeness and correct interpretation of the information submitted. Corrections were made where necessary, and the Letter Tracking File was finalized.

4.0 CONCLUSIONS AND RECOMMENDATIONS

In addition to evaluating and documenting PRP responses, the objectives of this analysis were to identify any additional PRPs not previously known to the EPA and to provide suggestions for further action by EPA, either in the form of reevaluation of those PRPs who never received information requests or followup letters for additional information from those PRPs who may not have responded adequately. ICAIR's conclusions and recommendations in each of these categories are provided below.

4.1 Additional PRPs

Seven of the responders identified other companies who owned the premises or operated their facilities during the 1960-1976 time period.

- The PRP, Adams and Westlake Ltd., identified the Leo Corporation, formerly the Adams & Westlake Company, a Delaware Corporation, as a company which manufactured aluminum windows for transit cars, motor homes and buses during the relevant time period. This company was located at 1025 N. Michigan Street and changed its name from the Adams & Westlake Company to the Leo Corporation on December 16, 1982. An Information Request to the Leo Corporation may uncover a relationship with Himco between 1960 and 1976. Unfortunately, the Leo Corporation became inoperative and void on March 1, 1984 for nonpayment of taxes. A Richard L. Champlin and Scott Hodes were president and vice president, respectively, of the Leo Corporation in 1982. No addresses for these individuals were listed in the State documents enclosed in the Adams and Westlake Ltd. response package.
- The PRP, Beazer Materials and Services (formerly Koppers Company, Inc.), identified Verdant Corporation, an Indiana corporation, which owned and leased the premises to Kopper's subsidiary, Parr, Inc., starting August 1, 1976. No information on the prior use of the buildings by the Verdant Corporation is available. An Information Request to Verdant Corporation is recommended.
- Gelco Truck Leasing Corporation purchased their present facility at 2220 Toledo Road, Elkhart, Indiana, from INE, Inc., an Indiana corporation (formerly Three L Corporation), on September 3, 1982. Gelco Corporation's response package included warranty deeds from the owners of the land (Ford R. Stutsman and Elizabeth Stutsman) granting the West and East parcels of the property to the Three L Corporation and INE, Inc. in 1971 and 1975, respectively. On December 27, 1974 Three L Corporation and INE were merged, with INE, Inc. as the surviving corporation. However, no information concerning INE's business operations at 2220 Toledo Road was provided by Gelco. An Information Request to INE, Inc. may uncover a relationship with Himco during the relevant time period. A current address for INE was not provided; however, the law firm of Yoder, Ainlay, Ulmer & Buckingham of Goshen, Indiana handled the 1974 merger.
- All Phase Electric Company refers EPA to previous owners, Elkhart Electric Supply Company, which used Himco since 1971.

- Conrail Corporation was not formed until April 1, 1976. The previous owner/operator of the Elkhart Freight Yard (not identified) may have used Himco.
- Klinger Pharmacy was purchased by its current owners in 1984. Refers EPA to the previous owner, Eugene B. Klinger of Edwardsburg, Indiana.
- Linville Olds-Cadillac took over the previous McHenry Olds-Cadillac auto dealership in 1988. Refers EPA to Mr. McHenry's attorney, Victor Arko, P.O. Box 18, Elkhart, Indiana.

4.2 Nonresponding PRPs

The Letter Tracking File contains the names of 39 PRPs who were sent information requests but for which there is no record of response. A second attempt to obtain information from these PRPs is recommended. It is suggested that the Information Request specify the time period in question (1960 to 1976) and request the PRPs indicate how long they have been at their current address and any information they may have about prior ownership and use of their facilities. These questions may lead to the identification of other businesses who may have used Himco 30 years ago.

4.3 PRPs Not Contacted

Of the 583 PRPs identified by the EPA through its investigative processes, 376 were never sent Information Requests. Since the majority of these appear to be businesses that would not normally generate hazardous wastes (e.g., restaurants, jewelry stores, schools, motels, etc.), it is apparent the EPA had previously made decisions to eliminate these PRPs from further consideration. However, there is no documentation of these decisions in the files reviewed by ICAIR or Donohue & Associates.

It is recommended documentation of these decisions be included in the site files. It is also recommended the PRP list be reviewed again, in light of recent sampling results, to determine if any of these PRPs should now be contacted.

4.4 Inadequate Responses

ICAIR's review of the files has not identified any PRPs who have submitted inadequate responses. The EPA was diligent in requesting and obtaining supplemental information where responses to the initial requests were deemed inadequate. On the whole, the PRPs were extremely responsive in their search for records, naming of knowledgeable individuals and submittal of background information supporting their responses.

4.5 Responses Not Reviewed by ICAIR

The Database lists eight PRPs for whom evidence in the EPA's files (mail receipts, etc.) indicates responses were submitted. However, the responses were not contained in the EPA's files. In addition, two PRPs (Midwestern Rubber Products and General Electric Appliance Corporation) had requested CBI handling and their files are now located in the CBI lockup at EPA's Region V offices. Therefore, we were not able to review these ten responses.

4.6 Conclusions

Of the 583 PRPs originally listed, 207 were sent Information Requests. Of these, records indicate that 168 responded. Ten of these responses were not able to be reviewed by ICAIR. These conclusions were based on the 158 response files reviewed. An overall review of the responses from the 158 PRPs indicates that:

- Only 44 of the 158 responders specifically indicated use of Himco for disposal during the period 01/01/60 through 12/31/76.
- None of the responding PRPs identified other transporters. As far as can be determined, this site was not open to receipt of waste from other private or commercial transporters, haulers or scavengers.
- Seven additional PRPs (above the 158) were named by responders as previous owners/operators of the PRPs' business or facilities.
- None of the PRPs admitted sending hazardous wastes to the Himco landfill.
- All 35 PRPs who indicated they generated hazardous wastes provided sufficient information describing their hazardous waste disposal practices and identifying the transporters/recycling firms used.
- Almost all responding PRPs were extremely cooperative in their search for records and preparation of responses, and the EPA was diligent in following up on initially inadequate responses. A few brief responses were received from small operations (e.g., Bumper Tavern) that clearly could not be classified as generators of hazardous waste by their type of operations.
